

PROJECT REPORT

Modern To-Do Task Manager

Submitted By

Name: PRIYADHARSHINI K

Intern ID: CITS5067

Duration: 4 Weeks

1. Introduction

The Modern To-Do Task Manager is a web-based application designed to help users organize and manage their daily tasks efficiently. The application provides a simple and user-friendly interface where users can add, edit, delete, and track the completion status of tasks.

The project demonstrates the use of front-end web development technologies and browser local storage for persistent data management.

2. Objectives

- To create a task management application.
 - To improve productivity through task organization.
 - To implement CRUD operations (Create, Read, Update, Delete).
 - To store task data using browser Local Storage.
 - To develop a responsive and modern user interface.
-

3. Technologies Used

- HTML5
 - CSS3
 - JavaScript
 - Browser Local Storage
-

4. Project Scope

This application helps users manage daily activities and tasks effectively. Users can create task lists, update existing tasks, mark completed tasks, and remove unnecessary tasks. The application stores data locally so that tasks remain available even after refreshing the browser.

5. Features

Add Tasks

Users can add new tasks using the input field.

Edit Tasks

Existing tasks can be modified whenever necessary.

Delete Tasks

Users can remove completed or unwanted tasks.

Mark as Completed

Tasks can be marked as completed for better tracking.

Task Statistics

The application displays:

- Total Tasks
- Completed Tasks
- Pending Tasks

Local Storage Support

All tasks are stored in the browser's local storage and remain available after page refresh.

Task Filtering

Users can view:

- All Tasks
 - Active Tasks
 - Completed Tasks
-

6. System Requirements

Hardware Requirements

- Computer/Laptop
- Minimum 4 GB RAM

Software Requirements

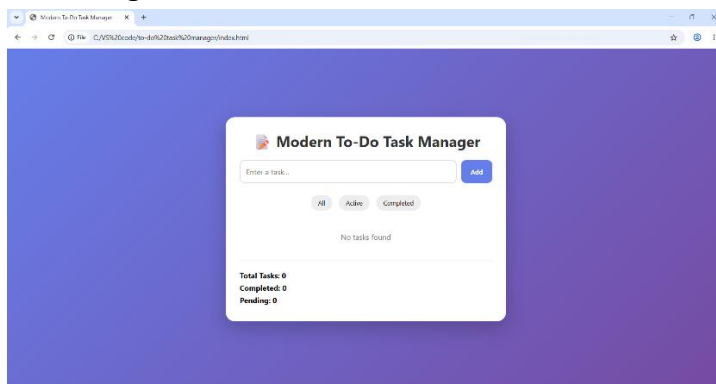

- Web Browser (Chrome, Edge, Firefox)
 - Text Editor (VS Code, Notepad++, etc.)
-

7. Working of the Application

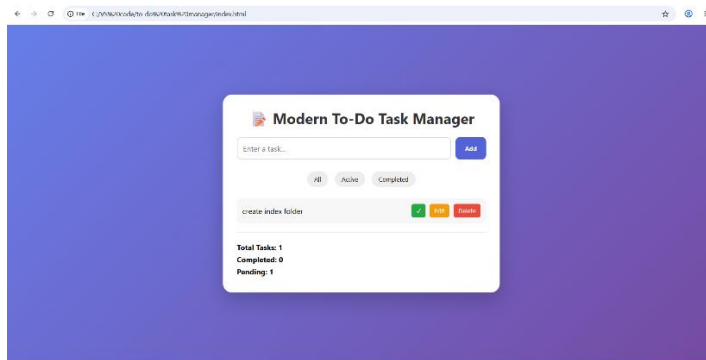

1. User enters a task.
 2. User clicks the Add button.
 3. Task is displayed in the task list.
 4. User can edit, delete, or mark tasks as completed.
 5. The application updates statistics automatically.
 6. Tasks are saved in Local Storage.

Delete tasks

9. Results

The Modern To-Do Task Manager was successfully developed and tested. The application allows efficient task management with features such as task creation, editing, deletion, completion tracking, filtering, and local storage support.

10. Conclusion

The project successfully demonstrates front-end web development concepts using HTML, CSS, and JavaScript. The application provides an effective solution for managing daily tasks while offering a clean and responsive user interface.

11. Future Enhancements

- Dark Mode
 - User Authentication
 - Task Categories
 - Due Date Management
 - Notifications and Reminders
 - Cloud Database Integration
-
